

List of Contents

NUMBER 1

Jeong-Soo Park and Jangsun Baek	1 Efficient computation of maximum likelihood estimators in a spatial linear model with power exponential covariogram*
Carl E. Jacobson	9 Using AutoCAD for descriptive geometry exercises in undergraduate structural geology
Mark Jessell, Paul Bons, Lynn Evans, Terence Barr and Kurt Stuwe	17 Elle: the numerical simulation of metamorphic and deformation microstructures
Walt W. McNab Jr	31 A Monte Carlo simulation method for assessing biotransformation effects on groundwater fuel hydrocarbon plume lengths
Yukari Kido, Tetsuro Tsuru, Jin-Oh Park, Toshihiko Higashikata, Yoshiyuki Kaneda and Yoshiteru Kono	43 Three-dimensional overview of the Japan Trench an example of using the Frontier database system
N.M. Sirakov and F.H. Muge	59 A system for reconstructing and visualising three-dimensional objects
<i>Short Notes</i>	
Yongliang Chen and Xiguo Jiao	71 Semivariogram fitting with linear programming
Yerahmiel Doytsher and John K. Hall	77 Simplified algorithms for isometric and perspective projections with hidden line removal
S.P. Das Gupta	85 Application of a fuzzy pattern recognition method in borehole geophysics
Clifford P. Ambers	91 AutoLISP [®] software tools for handling powder X-ray diffraction data in the AutoCAD [®] environment
Fuat Yavuz	97 PYROX: A computer program for the IMA pyroxene classification and calculation scheme
Y.H. Chang, M.D. Scrimshaw and J.N. Lester	109 A revised Grain-Size Trend Analysis program to define net sediment transport pathways
J.D. Blower	115 A three-dimensional network model of permeability in vesicular material
<i>Book review</i>	
Li Zheng	121 Geostatistics: Modeling Spatial Uncertainty by Jean-Paul Chiles and Pierre Delfiner, Wiley, New York, 1999, 695 pp., ISBN 0-471-08315-1, US \$125.00
<i>Software review</i>	
Geoff Bohling	125 VARIOWIN: software for spatial data analysis in 2D by van Pannatier. Springer, New York, 1996, 91pp, 3.5-inch IBM-compatible diskette, ISBN 0-387-94679-9, US \$52.95
Michael E. Ritter and John C. Butler	129 Another Node On the interNet
	I Current Literature Survey

NUMBER 2

Thomas A. Jones	133	Using flowpaths and vector fields in object-based modeling
Mingren Shi and James R. Carr	139	A modified code for R-mode correspondence analysis of large-scale problems*
Pei-Jung Chung, Michael L. Jost and Johann F. Böhme	147	Estimation of seismic-wave parameters and signal detection using maximum-likelihood methods
Roger Luff, Matthias Haeckel and Klaus Wallmann	157	Robust and fast FORTRAN and MATLAB [®] libraries to calculate pH distributions in marine systems*
Serhat Akin	171	Analysis of tracer tests with simple spreadsheet models*
G. Gottardi and M. Venutelli	179	UPF: two-dimensional finite-element groundwater flow model for saturated-unsaturated soils*
François Risacher and Alain Clement	191	A computer program for the simulation of evaporation of natural waters to high concentration*
Derek R. Peddle, H. Peter White, Raymond J. Soffer, John R. Miller and Ellsworth F. LeDrew	203	Reflectance processing of remote sensing spectroradiometer data*
<i>Short Notes</i> Fuat Yavuz	215	LIMICA: a program for estimating Li from electron-microprobe mica analyses and classifying trioctahedral micas in terms of composition and octahedral site occupancy*
E. C. Grunsky	229	A program for computing RQ-mode principal components analysis for S-PLUS and R*
Masoud Hessami, François Anctil and Alain A. Viau	237	Delaunay implementation to improve kriging computing efficiency*
Fuat Yavuz	241	NBTA: a program for columbite-group minerals in rare-element granites and granitic pegmatites*
<i>Book Reviews</i> Arlei Benedito Macedo	249	Multimedia cartography W. Cartwright, M. Peterson and G. Gartner (Eds.). Springer-Verlag, Berlin, 1999, 343pp., US\$ 59.00, ISBN 3-540-65818-1.
B. S. Daya Sagar	251	Computer processing of remotely sensed images: an introduction, 2nd Edition Paul M. Mather. Wiley, Chichester, 1999, 292pp., US\$ 65.00 (Includes CD with image processing software for Windows), ISBN 0-471-98550-3.
X.-S. Yang	253	Mathematical modeling in the environment Charles R. Hadlock. The Mathematical Association of America, Washington, DC, 1998, 312pp., US\$ 55.00, ISBN 0-88385-709-X.
E. C. Grunsky	255	Aspects of multivariate statistical analysis in geology Richard A. Reymont and Enrico Savazzi. Elsevier, Amsterdam, 1999, 285pp., 1 CD. ISBN 0-444-50412-5, US\$ 76
<i>Comments</i> Heng Tsai	257	Comment on "A FORTRAN program for fitting Weibull distribution and generating samples"; by A. Ghosh
Amitava Ghosh	261	Reply to comment on "A FORTRAN program for fitting Weibull distribution and generating samples" by H. Tsai

Marilyn J. Suiter and
Michelle Hall-Wallace

263 Another Node On the interNet

I Current Literature Survey

NUMBER 3

K. Develi, T. Babadagli and C. Comlekci

265 A new computer-controlled surface-scanning device for measurement of fracture surface roughness*

Friedrich Gebhardt

279 Spatial cluster test based on triplets of districts

Neil A. Wells

289 3D.BAS, a QuickBasic program for three-dimensional stereo-scatterplots of XYZ data*

Jeffrey Brainerd and Alex Pang

299 Interactive map projections and distortion*

I.V. Radhakrishna Murthy, K.V. Swamy
and S. Jagannadha Rao

315 Automatic inversion of magnetic anomalies of faults*

G. Espinosa-Paredes, A. Garcia,
E. Santoyo and I. Hernandez

327 TEMLOPI/V.2: a computer program for estimation of fully transient temperatures in geothermal wells during circulation and shut-in*

K. Prabhakar Rao and K. Mallick

345 C++ classes for electromagnetic depth sounding on a transitional earth using vertical magnetic dipole source*

Lachlan K. Stewart, Ken J. Woolfe
and Dan P. Zwart

351 A new tool for the Integration, graphical presentation and comparison of files containing palaeocurrent data*

Short Notes

Indranil Roy, B.C. Sarkar
and A. Chattopadhyay

357 MINFO — a prototype mineral information database for iron ore resources of India

Wei Luo

363 LANDSAP: a coupled surface and subsurface cellular automata model for landform simulation*

Book Reviews

U. Zier and J.P. Morgan

369 High-performance computing R.J. Allan, M.F. Guest, A.D. Simpson, D.S. Henty and D.A. Nicole; Kluwer Academic/Plenum Publishers, New York, 584+xiii pp., US\$ 130.00, ISBN 0-306-46034-3

M. Mudelsee

371 Statistical Analysis in Climate Research Hans von Storch and Francis W. Zwiers; Cambridge University Press, Cambridge, 1999, x+484pp, US\$ 110, ISBN 0-521-45071-3 (hardback)

Kim Kastens

NUMBER 4

379 Guest Editorial

Richard A. Ketcham
and William D. Carlson

381 Acquisition, optimization and interpretation of X-ray computed tomographic imagery: applications to the geosciences

Ross R. Moore and Scott E. Johnson

401 Three-dimensional reconstruction and modelling of complexly folded surfaces using *Mathematica*

R. Marschallinger	419	Three-dimensional reconstruction and visualization of geological materials with IDL — examples and source code*
Malcolm J. Herbert and Christopher B. Jones	427	Contour correspondence for serial section reconstruction: complex scenarios in palaeontology
Alexander A. Proussevitch and Dork L. Sahagian	441	Recognition and separation of discrete objects within complex 3D voxelized structures
Mark Jessell	455	Three-dimensional geological modelling of potential-field data*
R. Marschallinger and S.E. Johnson	467	Presenting 3-D models of geological materials on the World Wide Web
Roddy V. Amenta	477	Three-dimensional computer modeling of fabric evolution in igneous rocks*
Roddy V. Amenta	477	Three-dimensional computer modeling of fabric evolution in igneous rocks*
<i>Short Notes</i> Dougal A. Jerram	485	Visual comparators for degree of grain-size sorting in two and three-dimensions*
Torsten Steiger	493	Nuclear magnetic resonance imaging in paleontology
Mary R. Marlino	497	Another Node On the interNet

NUMBER 5

Ute Christina Herzfeld and Oliver Zahner	499	A connectionist-geostatistical approach to automated image classification, applied to the analysis of crevasse patterns in surging ice
Qiuming Cheng, H. Russell, D. Sharpe, Frank Kenny and Ping Qin	513	GIS-based statistical and fractal/multifractal analysis of surface stream patterns in the Oak Ridges Moraine
Ricardo Diniz da Costa and John Starkey	527	PhotoLin: a program to identify and analyze linear structures in aerial photographs, satellite images and maps*
R. Tagliaferri, N. Pelosi, A. Ciaramella, G. Longo, M. Milano and F. Barone	535	Soft computing methodologies for spectral analysis in cyclo-stratigraphy*
Eulogio Pardo-Igúzquiza and Peter A. Dowd	549	VARIOG2D: a computer program for estimating the semi-variogram and its uncertainty*
A. Guillen, Ch. Meunier, X. Renaud and Ph. Repusseau	563	New Internet tools to manage geological and geophysical data*
C.-T. Lee, Q.-Z. Yin and T.-C. Lee	577	An internal normalization technique for unmixing total-spiked mixtures with application to MC-ICP-MS*
M. Alarcón and S. Alonso	583	Computing 3-D atmospheric trajectories for complex orography: application to a case study of strong convection in the western Mediterranean*
<i>Short Notes</i> Ken J. Woolfe, Lachlan K. Stewart and Andrew D. Heap	597	Wind and currents 2000: A new tool for the visualisation of vectorial time-series data*
Jos Manuel Vacas Pea	601	Isogons: a program in pascal to draw the dip isogons of folds*

Book Reviews

James R. Carr

- 607 Data analysis in the Earth sciences using Matlab. Gerard Middleton; Prentice-Hall, Upper Saddle River, NJ, 2000, 260pp., ISBN 0133935051 (paperback+disk)

M. Gonçalves

- 609 Computing for scientists: principles of programming with C++ and Fortran 90. R.J. Barlow and A.R. Barnett; Wiley, Chichester, 1998, 292pp., price US\$49.95, ISBN 0-471-95596-5

Barbara DeFelice

- 611 Another Node On the interNet
615 Announcement. Best paper award 1999

NUMBER 6

- 617 Guest Editorial
- Michael Z. Li and Carl L. Amos
- 619 SEDTRANS96: the upgraded and better calibrated sediment-transport model for continental shelves.
- Janette L. Cookman and Peter B. Flemings
- 647 STORMSED1.0: hydrodynamics and sediment transport in a 2-D, steady-state, wind- and wave-driven coastal circulation model.
- Courtney K. Harris and Patricia L. Wiberg
- 675 A two-dimensional, time-dependent model of suspended sediment transport and bed reworking for continental shelves
- David B. Bahr, Eric W.H. Hutton, James P.M. Syvitski and Lincoln F. Pratson
- 691 Exponential approximations to compacted sediment porosity profiles.
- Lincoln F. Pratson, Jasim Imran, Eric W.H. Hutton, Gary Parker and James P.M. Syvitski
- 701 BANG1D: a one-dimensional, Lagrangian model of subaqueous turbid clouds.
- Jasim Imran, Peter Harff and Gary Parker
- 717 A numerical model of submarine debris flow with graphical user interface.
- James P.M. Syvitski and Eric W.H. Hutton
- 731 2D SEDFLUX 1.0C: an advanced process-response numerical model for the fill of marine sedimentary basins.
- James R. Carr
- 755 Another Node On the interNet

NUMBER 7

- Roseanna M. Neupauer and Brian Borchers
- 757 A MATLAB implementation of the minimum relative entropy method for linear inverse problems*
- Xianlin Ma and Tingting Yao
- 763 A program for 2D modeling (cross) correlogram tables using fast Fourier transform*
- George Ch. Miliareisis
- 775 Geomorphometric mapping of Zagros Ranges at regional scale
- Cathal G. Dillon, Paul F. Carey and Richard H. Worden
- 787 Fractscript: A macro for calculating the fractal dimension of object perimeters in images of multiple objects*
- Nicholas C. Coops and Peter C. Catling
- 795 Prediction of historical forest habitat patterns using binomial distributions and simple Boolean logic from high spatial resolution remote sensing

W.E. Featherstone	807	Absolute and relative testing of gravimetric geoid models using Global Positioning System and orthometric height data*
A. Crave and P. Davy	815	A stochastic "precipiton" model for simulating erosion/sedimentation dynamics
Michael Mineter and Nick Hulton	829	Parallel processing for finite-difference modelling of ice sheets
Simon W. Houlding	839	XML—an opportunity for <meaningful> data standards in the geosciences*
Junko Iwahashi, Shiaki Watanabe and Takahiko Furuya	851	Landform analysis of slope movements using DEM in Higashikubiki area, Japan
Pankajakshan Thadathil, Aravind K. Ghosh, J.S. Sarupria and V.V. Gopalakrishna	867	An interactive graphical system for XBT data quality control and visualization*
<i>Short Notes</i> Z.W. Yu	877	Surface interpolation from irregularly distributed points using surface splines, with Fortran program*
A. Dogan Paktunc	883	MODAN—a computer program for estimating mineral quantities based on bulk composition: windows version*
Carne Hervada-Sala and Eusebi Jarauta-Bragulat	887	Modifications to KB2D program in GSLIB to allow use of tabulated covariances calculated with fast Fourier transform method*
<i>Book Review</i> Xiaoyong Zhan	891	Applied Mathematics in Hydrogeology. Tien-Chang Lee, Lewis Publishers, 1999, 382pp, ISBN 1-56670-375-1, US \$69.95
Lawrie Phipps	895	Another Node On the interNet

NUMBER 8

Judy Ehlen and Russel S. Harmon	899	GeoComp 99: GeoComputation and the Geosciences
H.H. Asadi and M. Hale	901	A predictive GIS model for mapping potential gold and base metal mineralization in Takab area, Iran
M.J. Gooch and J.H. Chandler	913	Failure prediction in automatically generated digital elevation models
Robert J. Abrahart, Linda See and Pauline E. Kneale	921	Investigating the role of saliency analysis with a neural network rainfall-runoff model
C.D. Lloyd and P.M. Atkinson	929	Assessing uncertainty in estimates with ordinary and indicator kriging
M.A. Oliver and A.L. Khayrat	939	A geostatistical investigation of the spatial variation of radon in soil
Gregory E. Tucker, Stephen T. Lancaster, Nicole M. Gasparini, Rafael L. Bras and Scott M. Rybarczyk	959	An object-oriented framework for distributed hydrologic and geomorphic modeling using triangulated irregular networks
